

What readers are saying about *How to Do Space Age Work with a Stone Age Brain*™

“If you, your team or your company is not organized and fully functioning...you are wasting valuable time and money. *How to Do Space Age Work with a Stone Age Brain*™ should be required reading for every employee and small business owner.”

Jim Horan, best-selling author “The One Page Business Plan”™

“Your book gave me the courage to cull through 15 years of paper files. After accumulating four huge bags of old statements and outdated reports for shredding, I reclaimed lots of space and reorganized my office into your Info Zones. I’m loving my clean, tidy and up-to-date office! Thanks!”

Liz Guthridge, Connect Consulting

“When I started reading *How to Do Space Age Work with a Stone Age Brain*™, I realized why the author tells us that we do not have to read it all at once. Indeed, I keep this book as my desktop reference for just about anything I do at work. The most amazing thing about Eve's book is that I can open it up to any page and find absolutely invaluable tips for my daily activities. I recommend this book for all busy professionals who are overwhelmed with the information avalanche and need new ways to improve their effectiveness. Satisfaction guaranteed!”

Boris Letuchy, Certified Facility Manager

“It's always fun to read a book that keeps your interest and Eve’s writing style keeps you reading because her book is both fun and offers lots of practical suggestions. The tests that she urges folks to take to identify how they think and operate help make the whole concept personal. Eve promises that one will gain an hour a day if her suggestions are embraced and this is very true. A great gift for anyone!”

Joy Short (KPSI Radio: Joy Short Show)

“This book is for anyone who wants to get more out of their day and have some fun doing it. I've never experienced an interactive book like it. Somewhere between the Brain and Information sections I realized that anyone can use Eve's brain-based tips to improve their information management forever. As a sales expert, I'm already well organized, so the benefits of investing time to make time is a part of the way I work. I was so impressed with Eve's new paper and computer tips that I bought my assistant her own copy. She's using it as a desk reference in her **Action Zone**.”

Michael Cannon, Silver Bullet Sales Group

“Don’t go into business for yourself without it! Eve Abbott’s one-woman battle against the Clutter Culture is packed with useful information. But what surprised me is the range of information offered. You would expect chapters on office file management, but she also tackles identity theft - very time consuming if it happens to you. She pays attention to our natural biological rhythms so we take advantage of our energy peaks and valleys. Eve leaves no stone unturned in her quest to simplify the complex. There is something for everyone here. Yes, you will have to do some work to follow Eve’s systems, but it will pay you dividends. Time is a non-renewable resource. Don’t waste it!”

Christopher Richards, Web video producer, Writer and Web designer

"Whether you're a CEO, consultant, academic or professional, the brain information and exercises in Eve's book are for anyone wanting to leverage "more of themselves" for improved effectiveness at work. Her tip about Subject-Only E-mails changed the way I do e-mail with clients and colleagues and saves me time every day! I give *How to Do Space Age Work with a Stone Age Brain*™ a "High 5" for everyone who wants to get out of the overwhelm of working in the Space Age."
